Education for _Real_ AI Adoption

Generative AI education is boring. Or complicated. Or purely theoretical.

JennAI takes a different approach. We create custom workshops for members or teams by understanding your goals, tech stack, and how AI already fits in.

Teams leave with internal use cases they can deploy immediately.

No generic slide decks around here.

Workshops are **built around your organization's needs and tech stack.**

No fluff.
No complex math or theory.
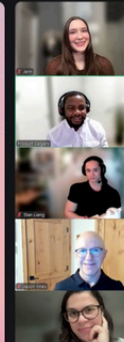

Just **actionable insights** you can **apply today**.

Never worked with AI?
Work with AI everyday?

Our workshops **meet your team where they are.**

Platform Calgary supports founders with the space, programs, and resources to build and grow new ventures.

We delivered the second session of their four-part **Startup Essentials: Discover Program** during its first in-person pilot, where founders learned how to build MVPs using vibe coding best practices.
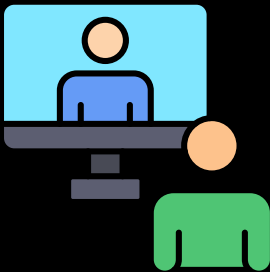

8 in 10
**attendees ranked ours as the best session**

Custom workshop material created

Workshop delivered in person or online

What Attendees Say

" I just loved your teaching style, thank you so much for showing me how to vibe code! "

" I attended your session with SUE. It was excellent. Your knowledge and ability to communicate were super. "

" I attended your seminar this week at the UofC and found it extremely insightful and helpful. "

Curious what a presentation or workshop could look like? **Check out the one below!**

A practical guide to
Career Ready AI
